

Programming Assignment Grading

1. Each assignment will be worth 30 points
2. Each assignment will be broken down as follows:
 - a. 10 points for design (header, pseudo-code, comments, formatting)
 - i. Does header include the following?
 1. Function Title
 2. Summary
 3. Inputs
 4. Outputs
 5. Pseudocode
 - ii. Do Pseudocode and comments match?
 - iii. Are indentations correct?
 - b. 10 points for execution (does it compile and run without crashing?)
 - c. 10 points for correctness (does it comply with the listed requirements?)

```

/*****
* Function Title: Main
*
* Summary: Prints "Hello World" on console
*
* Inputs: none
* Outputs: none
*
* Compile instructions: gcc hello.c -o hello.exe
*****/
* Pseudocode
*
* Begin
*   Print "Hello World"
* End
*****/

#include <stdio.h>

int main()
{
    // Begin
    printf("Hello World\n"); // Print "Hello World"

    return 0;

    // End
}
```
